The image displays a uniform grid of 40 rectangular boxes, organized into 5 horizontal rows and 8 vertical columns. Each box is a rounded rectangle with a thin black outline. The color of each box varies, creating a repeating pattern across the grid. The colors used are yellow, blue, red, and a light green or lime color. The arrangement is such that each row contains one box of each color, and the colors transition from left to right and top to bottom in a cyclical manner.

VIERNES

The image displays a uniform grid of 40 rectangular boxes, organized into 5 horizontal rows and 8 vertical columns. Each box is a rounded rectangle with a thin black outline. The color of each box varies by its position in the grid: the first column consists entirely of yellow boxes; the second column consists entirely of blue boxes; the third column consists entirely of red boxes; and the fourth through eighth columns consist entirely of light green boxes. All boxes are of equal size and are evenly spaced both horizontally and vertically.
